

Blood tests for further examinations of Leonbergers.

The blood samples will be stored free of charge for the “Schweizerische Leonberger Club” at the veterinary department of the university of Berne.

How much blood ?

Send 2 to 5 ml of EDTA-blood per dog in a well protected packing. (Do not freeze it).

How the sample should be marked ?

Name of the dog
Number of the Registration
Date of birth
Name of the owner
Date of taking of the blood sample

How to pack and send to whom ?

Do not send it over the weekend, if possible.

Send to: **Vetsuisse Fakultät der Universität Bern**
Institut für Genetik
Prof. Dr. T. Leeb
Bremgartenstr. 109a
3012 Bern

Please send an e-mail to tosso.leebe@itz.unibe.ch before sending the blood sample with the message, that a sample is on the way.

Further informations.

If you have a written diagnosis from the illness of the dog, please send it together with the blood sample.
